Description

The **AKY499BL** is a versatile case that is perfect both for players and for home or office space. The black, brushed front panel with blue accents makes the case look aesthetic and elegant.
It has been designed with care of high performance and the greatest possible versatility. The casing allows one of four different types of motherboards to be used. In addition to the **Micro ATX**, **Mini ITX** and **Flex ATX**, it is possible to mount a standard **ATX** motherboard, which is an important asset in adapting the components to changing needs and requirements. **Three 5.25" external bays** will allow to mount a CD/DVD drive or burner – those can be also transformed into a 3.5" or 2.5" by using a tool-less bay, if needed. Inside there are **three 3.5”** bays (convertible to 2.5"), **one 2.5”** bay and **one 5.25”** bay, giving a total of **5 internal bays** for mounting disks and drives. The cable management system and customizable cutouts facilitate the installation of components, while the spacious interior allows for the installation of graphics cards up to **260 mm** long.
The case makes it possible to install **two fans**: side (12 cm) and rear (8 or 9.2 cm). The maximum height of CPU cooling system is **160 mm**. On the front panel there is a **USB 3.0** port for fast data transfer and standard **2.0 port** for connecting peripherals such as a mouse or keyboard. The headphone and microphone inputs are located right next to it, providing easy and fast access to the peripherals.
To protect the environment, all Akyga cases are packed in EcoBoxes.
